

Zero Point Field Energy

Many Americans suffer from chronic pain. Some have deteriorated spinal discs and others have arthritis or fibromyalgia. Where this pain comes from and how to alleviate this pain are questions many would love getting the answer to.

Conversely the modalities to treat pain run the gamut from taking pain killing drugs, to treatment with chiropractic, physical therapy or hypnosis and a myriad of other modalities too numerous to list. Now add to that list something that has sprung up from the study of quantum physics. We are talking about the application of a specific type of energy, called zero point energy, to the energy fields of the body to help alleviate pain and speed healing.

Quantum physics tells us that everything in the universe is energy. Our bodies are energy and in fact there are energy fields around all living things that can be measured with a specialized instrument called a **Gas Discharge Visualizer**. Through the application of this energy, the body's own energy field is brought into a state of homeostasis, or balance, thus resulting in an increased ability to self heal and alleviate pain.

It may sound like science fiction but the control of energy and the study of how to better create it and handle it has been the focus by many key researchers for quite some time, beginning with Einstein. The research into this kind of sub atomic energy will not only help heal a body but could also lead to technology that may allow us to power a whole city without having to use fossil fuels.

And the field of bio-energy holds some very promising possibilities for quick and inexpensive pain relief. At present, there is only one company making products utilizing this technology and that is Omega Global. Their proprietary AMized® Fusion Technology changes the structure of molecules and charges matter to give off a zero point energy force that is called AMized® resonance. This allows your body to have access to a healing energy from within itself, and brings every facet of the body (mental, emotional, physical and spiritual) into unison.

When you use a product that has been charged with zero point energy, it reminds your body cells "where they came from". It reminds them that they were once healthy cells and to return to such a state. Thus, it puts the body in a favorable state to bring on the "self healing aspects" from within and to subside the pain it is having. Getting rid of pain is not the only benefit of zero point energy. Look at the list below of some of the things people have had success with:

| | |
|---|--|
| * Arthritis & rheumatism | * Promotes Cardiovascular health |
| * Increases negative ion absorption | * Fights Osteoporosis |
| * Joint and muscle pain | * Protects from Parkinsons, helps reduce tremors |
| * Shoulder pain | * Releases body's natural painkillers |
| * Backache, headache and neck ache | * Improves blood circulation |
| * Counteracts Harmful Cell phone radiation | * Aids in Detoxification |
| * Respiratory Problems: coughs & asthma | * Relieves Pain |
| * Constipation | * Purify the body |
| * Inflammation | * Removes accumulated toxins |
| * Insomnia | * Promotes regeneration and fast healing |
| * Jet lag Stress | * Increases metabolism between blood and tissue |
| * Migraine Headaches | * Beats fatigue/tiredness and improves alertness |
| * Digestive problems | * Controls Diabetes |
| * Increases strength and physical performance | * Stabilizes High/Low Blood Pressure |
| * Improves mood and helps depression | * Helps get rid of Acne |
| * Calming effect for Nervousness & anxiety | |

Man-made Chaos

It is a well-known fact that our bodies are under constant stress by conditions that are man made and virtually invisible to the human senses. EMF's and ELF's transmitted over wave forms can penetrate right through the physical body. The stress creates weakened immune function. Any device plugged into the wall, high-tension power lines, cell phones, computers, satellites, microwaves, radio and TV signals are emitting waves which travel into the body, creating significant imbalance in the body's naturally occurring bio-field.

When the immune system is weakened, the body cannot perform optimally and becomes vulnerable to adverse effects such as bacteria, fungus, viral infection or even worse, degenerative conditions like cancer, heart disease, diabetes, fibromyalgia, chronic fatigue syndrome, and so on.

ZeroPoint and Bio-Resonate Wave Forms

Zero Point Technology has the ability of changing subtle energy to wave forms that harmonically balance physical body parts. Body parts that are at ease have energy that flows with no effort, no resistance!

The Earth provides a multitude of naturally radiating minerals that can be imprinted with specified frequencies. With the addition of these new frequencies, the mineral becomes a reservoir of energy. This depository of energy responds to the intelligent consciousness of the imbalanced body part as it opens a channel to receive the balancing energy.

How do we know it works?

This is easily demonstrated with kinesiology, a simple muscle test. Put yourself in front of a microwave oven, computer screen or hold your cell phone and hold your arm straight out to your side. Have someone apply pressure above your wrist while you try to resist. When your energy field is being compromised, your brain is unable to effectively communicate to the muscles. You will be unable to resist the pressure being applied to your arm and it will weaken. Then put on the Zero Point Pendant or hold the AMwand and perform the same test. You will experience a very noticeable difference in your strength. There are many simple tests you can perform at home that will demonstrate the impacts that modern-day environmental energy is having on your body.

Your job is to keep yourself in a coherently "balanced" energetic state. The key to regain the balance is the use of the Zero Point Energy AMWand or Pendant and other Amega Global products.

Investigate this technology further. You'll be glad you did.
