Introduction

Everything is Energy...

Quantum Physics has revealed that everything in the Universe is energy. The energy fields of humans, plants, animals, the earth, and the rest of the Universe provide the interface that connects us all.

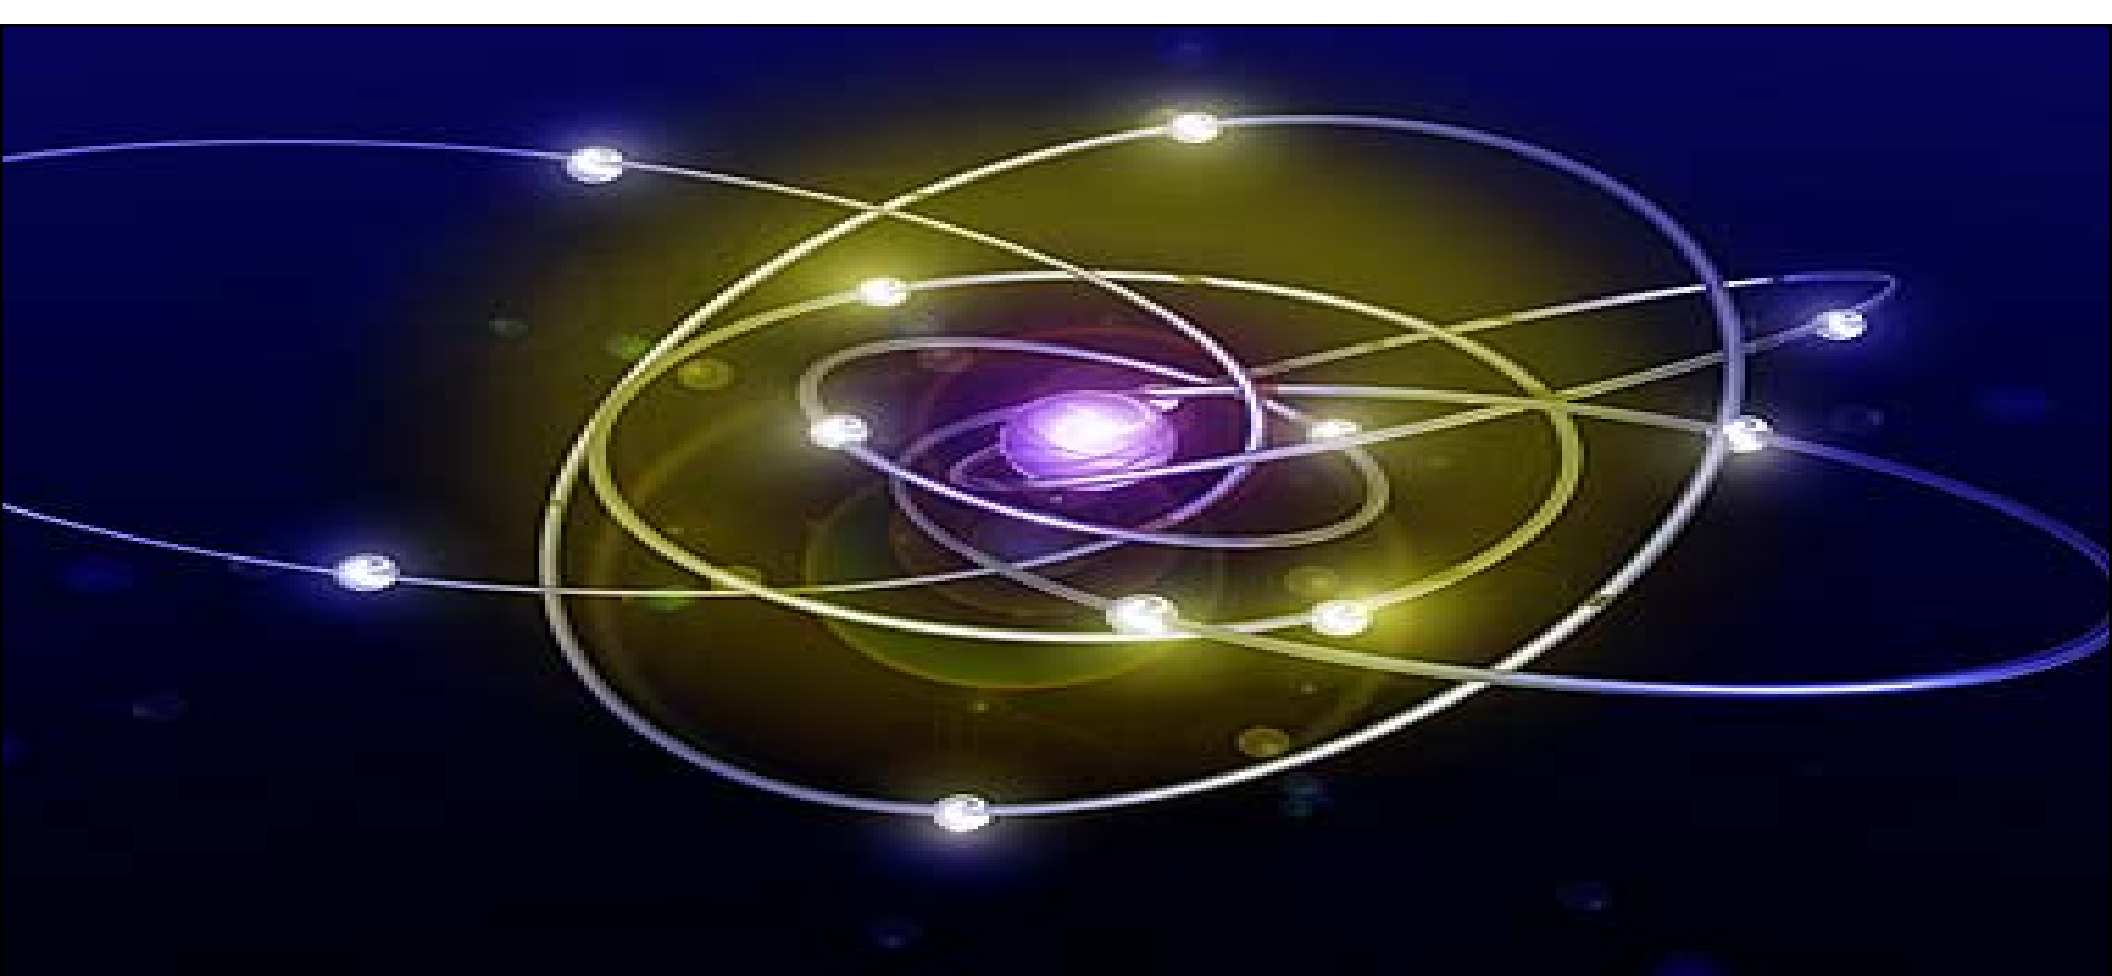

AMWand

A futuristic tool that is made of a special combination of granulated minerals processed using our own proprietary technology: AMized Fusion Technology (A.F.T.) to source the Universal Life Force energy that our body needs.

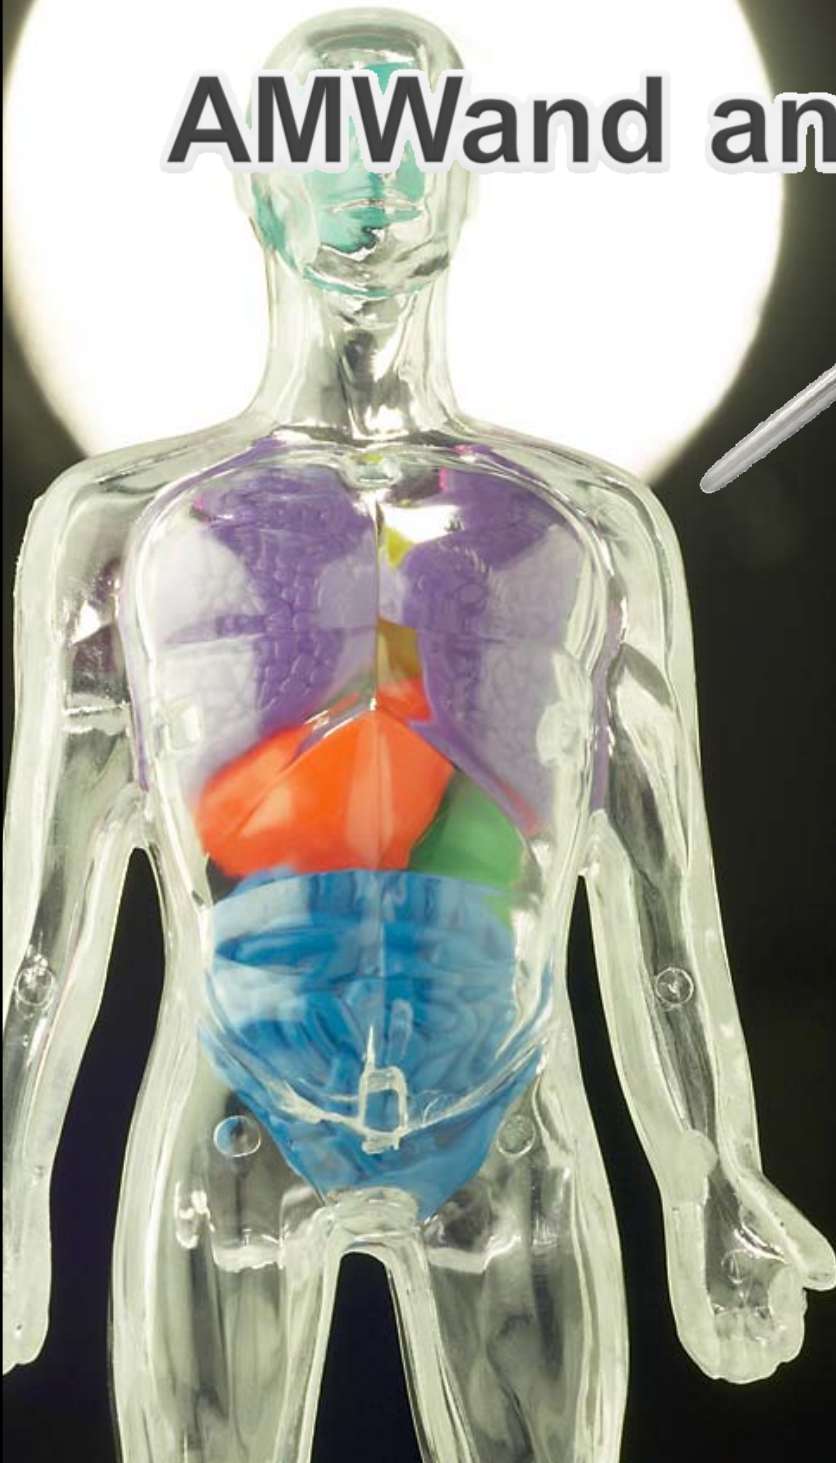

Bio-Energetic Fields

All living organisms have a special structure – The Bio Energy Field. The human body has a bio-energy field which consists of subtle organisms with energetic potential that gives strength and power to the biological field.

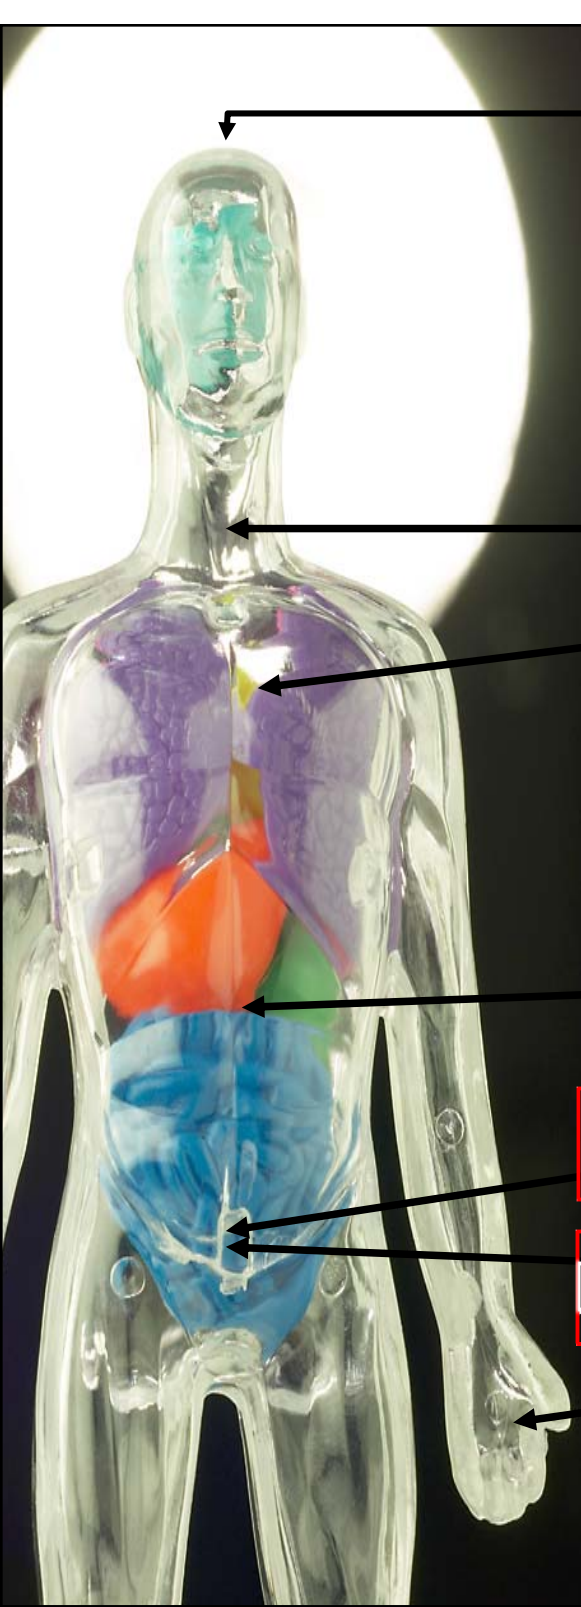

Balance and the unhindered flow of energy are important to health and wellness. As organs in our body function independently and interdependently, unlocking the secrets of bio-energetic fields will open new ways for diagnosis and treatment.
